

# Professional Services: The Right Ideas

Whether it's designing and implementing a document management system, process automation, creating workflows, performing legacy system conversions for over 50 products or pure consulting, Imaging Office System's Professional Services team knows how to chart your path forward. Over nearly 50 years in business, we've encountered every imaginable type of business process situation and information management challenge...and we've delivered the right solution every time.

Our level of experience and expertise doesn't exist with a Silicon Valley start-up! We've installed over 1,000 document management systems, using best-in-class software from Hyland OnBase, Upland's FileBound, OpenText, PSIGEN and more!

- Specialists in analyzing business needs, existing practices, and goals
- Focused on solving information management and business process challenges
- Experienced with just about every type of application, industry, and business environment
- Dedicated to delivering maximum value for client's information management investment
